

## **Positioning Statement – ImmunoComb<sup>®</sup> Canine VacciCheck.**

### ***Biogal's Canine VacciCheck is unique because it can:***

- Assist in diagnosis of disease status of dogs from one of these diseases.
- Help determine if a dog requires additional vaccination, thus reducing unnecessary vaccination and potential side effects.
- Be useful to determine a dog's unknown vaccination history.
- Determine if puppies have received immunity from an initial vaccination program.

### ***How does the Canine VacciCheck provide such benefits?***

- Provides semi quantitative serological results for the three core vaccines.
- Checks these three vaccines in one test in the veterinary clinic or lab.
- Supplies results within 21 minutes.
- Does not require a lab or lab technician to perform the test.
